A SPECIALTY.

Every Young Man

No matter what his other attainments may be, should have such a knowledge of business affairs as may be obtained in the

Rochester Business University

The claim to Superiority over every other Commercial School, made by this Institution, rests upon the fact of its possessing The Most Practical and Interesting Course of Study.

The Most Efficient Corps of Professors.

The Best System of Actual Business Practice.

The Most Beautiful Penmanship.

An unequalled arrangement of Text Books and Blanks.

The Best Facilities for Securing Employment for its Graduates, and THE LOWEST PRICES, considering all the advantages afforded.

Young men seeking employment, and a start in life, middle aged men who desire to change their vocation, and young ladies who desire an active and useful field in which to use their talents, should pursue a

Course of Business Training,

AT THE

ROCHESTER BUSINESS UNIVERSITY

Young men who have decided to pursue a Commercial Course, should consider that they will probably never have an opportunity to take such a course but once, and should therefore be very sure they are securing the *best advantage to be obtained*. A good course costs no more than a poor one. A competent course may make a boy's fortune, and a poor one may prove his financial ruin.

Applications for information regarding the Institution, will be promptly and cheerfully attended to. Address,

PREFACE.

In issuing the first number of the MONROE COUNTY BUSINESS DIRECTORY the Publishers would do violence to their feelings did they not return their heartfelt thanks to all who have aided them in the work, especially the ADVERTISERS, who, by their liberal patronage, have coöperated with them in making it a success. Every place represented in the DIRECTORY has been thoroughly canvassed, and great care taken to insure correctness in each and every particular. It is possible, however, that here and there an error has crept in, and escaped the “argus eye” of the **proof-reader**; but, when the task of compiling, correcting and revising a work so voluminous is taken into consideration, it is hoped that the business public, in whose interest the work is issued, will be as charitable in their verdict as they have been generous in the **bestowal** of their patronage.

PUBLISHERS.

THE CITY OF ROCHESTER

Rochester has become the most important point on the New York Central Railroad, and is constantly increasing in facilities for distributing its largely expanding range of fabricated articles, and the agricultural products of the immediate fertile vicinity. Situated on the Genesee River, about 7 miles from Lake Ontario, it is distant from Albany 229 miles, 68 miles east of Buffalo, and 70 miles from Niagara Falls. Population (1875) 90,000. The rapid growth of the city is owing chiefly to the water-power afforded by the river, which runs northward through the center of the city at a rapid descent of 268 feet within the city limits. Several sagacious and enterprising men among the early settlers, saw almost at a glance how this water-power could be made available for manufacturing purposes, and mill-races were speedily constructed on both sides of the river. The first mills erected were for the manufacture of flour, and the embryo city being located in the heart of a wheat growing region, the flour trade soon grew to gigantic proportions. This business is still extensively carried on. In addition to the flouring mills on these mill-races, are to be found nearly all kinds of manufacturing establishments, **viz**: iron foundries, cotton and woolen mills, furniture factories, printing offices, machine shops, paper mills, safe, scale, lock and show-case manufactories, stove foundries, stave and cooper shops, brass and edge tool works, locomotive lamp makers, coffee and spice mills, manufactories of agricultural implements, etc.

Our transportation facilities are not excelled in any other city. In addition to the great Central trunk line, the Erie Railway, the Northern Central and the State Line Railway reach out in other directions. The carrying trade on the Erie Canal is immense, and for heavy and bulky freight offers the cheapest and best means of transportation. The Genesee Valley Canal, a tributary of the Erie, has its northern terminus in this **city**; this branch extends southerly through the Genesee Valley to **Olean** on the Alleghany river, in Cattaraugus county. The volume of passenger travel on the various railroads through this city every day may be easily imagined by the number of trains **passing**; these count up about fifty daily. In addition, there are still *six* daily stage routes to adjacent towns off the line of the railroads. Of the **freight** trains running on the various railroads, we can give no accurate statement, but the number is almost incredible.

The agricultural resources of the **surrounding** country have of course contributed largely to the prosperity of this city, and furnishes its artizans with a large quantity of the raw material for manufacture. At an early date the foundation was laid of the extended manufacturing processes which have made Rochester famous all over the Union and the world. Attention was early turned to the manufacture of cabinet ware and chairs. This branch of industry has now reached a position to almost defy competition. The manufacture of boots and shoes is another enterprise that has been prosecuted with great vigor, and to-day our numerous shoe factories have customers in every State and Territory as well as in Canada. Boilers, engines, saw-mill machinery, and tools for all kinds of wood-working establishments are here made a specialty, and many of our firms have achieved a wide spread celebrity in those branches. Others of our artizans are extensively engaged in the manufacture of carriages and wagons, clothing, hats and caps, trunks, tinware and saddlery hardware, tents and awnings, glassware, barometers and thermometers, tobacco and cigars, belts and hose, soap and candles, etc., and in distilleries and breweries.

Perfumery and toilet articles have long been manufactured here, and the demand for the brands of Rochester **chemists** is constantly augmenting. In the production of ingenious and delicate instruments for use in all kinds of industrial processes, this city can boast its full quota, such as optical instruments, cutting machines, printing presses, burglar and fire proof **locks**, bookbinders' covering **machines**, dies for all uses, governor valves, **machinists'** tools, etc. In the more artistic work of manufacturing piano fortes and musical instruments, jewelry, and artificial limbs, and as painters, photographers, engravers and sculptors, many of our citizens have become somewhat famous. The new Water Works have added materially to the city's advantage in every way, as a manufacturing center and desirability for residence.

Our climate is **mild**,—the mean annual temperature being 46 deg., F. ; average of summer months, 70 deg.; of winter, 25 deg., and of spring and fall, 46 deg. And we have a soil on which flourishes the cultivation of fruit **trees**, flowers, ornamental shrubs and garden products, hence the **unparalleled** success of the Nursery business in this vicinity. No other place in the world rivals Rochester in the annual products of its **Nurseries**. These attract thousands of visitors from abroad, who all concur in calling this the **FLORAL CITY**. About 5,000 acres are planted with nursery stock in the environs of this city. Every spring and fall thousands of tons of trees and plants are shipped in all directions by our Nurserymen. Of recent years the cultivation and importation of Flower and Vegetable Seeds has become an **important** traffic, and the

quantity distributed by **our** leading houses reaches almost incredible figures. In the seed business Rochester stands without a rival. Another important business here prosecuted is the growth of scarcely a **decade**—the canning of fruits and vegetables. In the busy season the number of hands **employed** is only limited by the capacity of the buildings occupied by the packers, which are by no means of small proportions.

We have indicated so far only in briefest outline the diversified character of our Manufactures, and the ample means of transportation, but our Wholesale merchants have also built up a thriving trade far and wide. There are several extensive houses engaged in jobbing dry goods, carpets, millinery goods, clothing, groceries, teas, leather, tents and awnings, paper and stationery, **picture** frames and photographers' stock, confectioneries, paints, oils, etc. It was long ago truthfully **remarked** by one of our pioneer citizens (the first Mayor of the city) that "Rochester had little aid in its permanent improvement from foreign capital. It was settled and built by mechanics and merchants whose capital was economy, industry and perseverance." The wealth they have accumulated has been lavishly poured out for the adornment of the city and the culture of the rising generation.

In the character of its educational **institutions**—from the Primary department of its public schools, up to the University and Theological **Seminary**—no place in the United States stands higher. By the liberality of its citizens the school, academy and college buildings are structures of imposing grandeur and well adapted for the accommodation and tuition of the pupils. The newspapers and periodicals published in Rochester are a very good index of the character and intelligence of the people. There are five Daily papers (two German), and several Weeklies **and** **Monthlies**.

The city is well laid out in wide streets, on a nearly level plane, and there are now forty miles of these avenues improved, and more handsome and better shaded streets for driving cannot be found on the continent. Horse cars daily traverse the city **on** six different routes from the center of business, running east, west, north and south. The business part is nearly the exact central portion of the 16 square miles of area incorporated under the control of the municipal authorities. Of the character of the mercantile buildings it is only **necessary** to say that they will compare favorably with those of any city in the country, and of one **particularly**—the Powers' fire-proof commercial block, fronting on State and West Main **streets**—it is very doubtful if its superior, in size, design and appointments, can be found anywhere. It is built almost entirely of stone and iron, and fitted with all the improved conveniences for banking, mercantile and office purposes. The public buildings are numerous, and eligibly located as their uses **require**: the

Court House, City Hall, Free Academy and New York Central Railroad Depot being very near the center of business, while the Hospitals, House of Refuge, Rochester University, Theological Seminary and Benevolent Institutions are on spacious grounds in the suburbs.

The Rochester Driving Park Association has become famous for its magnificent grounds and unrivalled track, upon which, in 1874, Goldsmith Maid recorded her *fast* time of 2.14f.

Hotels have much power to give character to a city, and the citizens can point with pride to those which adorn Rochester. The reputation of several have long been established, *viz*: Osburn House, Congress Hall, Brackett House, National Hotel, **Waverly** House, **Whitcomb** House, **Gay's** Hotel, **Clinton** Hotel and Redfield House. The ample hotel accommodations have frequently caused this city to be selected for the holding of great Commercial and Political Conventions.

The capital invested in banking institutions is unprecedentedly large for the size of the city. In addition to the National Banks and private Banking houses, we have *four* Savings Banks, which are of incalculable benefit to the whole people, and it is due to the several Boards of Trustees to say that they have used their offices solely for the security of depositors and prosperity of the city.

POLICE DEPARTMENT.

Police Commissioners—George G. Clarkson, George G. Cooper and Frederick **Zimmer**.

Police Justice—Albert G. Wheeler.

ADVANTAGES OF ADVERTISING.

Among thorough **business men**, the advantages of judicious advertising are well known and practiced.

If a man has got a good **thing—an** article of commerce needed by the people, and which he wishes to dispose of, let him advertise it by all means. Don't think of waiting for buyers to make the discovery themselves. Thousands of persons who would become your customers don't know that they are in want of the article until they read your advertisement.

They read, and instantly they discover that you have precisely what they need, and wonder that they have never thought of the same thing themselves. This portion of the American public not only purchase your goods, but, whether they express it or not verbally, in their hearts they are very grateful to you, for having made a part of your knowledge their property.

The nineteenth century is a busy **one—people** have little time to think of anything except their own immediate business. They want to read and learn as they **run.—Advertisers' Gazette.**

 MISCELLANEOUS.

The seven wonders of the world are : **1st—The** Egyptian Pyramids. The **largest** of these is six hundred and three **feet** square and four hundred and sixty-nine feet high, and its base covers eleven and one quarter acres of ground. **2d—The** Mausoleum, erected to Mausolus, a king of Caria, by his widow Artimisia. It was sixty-three **feet** long and thirty-five **feet** high, five **feet** in length and two hundred and twenty **feet** in breadth. **4th—The** walls and Hanging Gardens of Babylon. These walls were stated by Herodotus to have been eighty-seven feet thick, three hundred and fifty feet high and sixty miles in length, and the statement is credited by modern antiquarians. **5th.—The** Colossus of **Rhodes**. This was a brazen statue of Apollo, one hundred and fifty feet in height, standing at the mouth of the harbor of Rhodes. **6th.—**The Statue of Jupiter Olympus, at Athens, which was made of ivory and gold, and was wonderful for its beauty rather than its size. **7th.—The** Pharos of Ptolemy, Philadelphus. **This was** a lighthouse, five hundred feet high, on the Island of Pharos, at Alexandria, in Egypt. A fire of wood was kept burning on its summit during the night to guide ships to the harbor.

An Illinois editor **says** : "Trying to do business without advertising is like winking in the **dark** ; you keep up a powerful winking, but nobody else has any idea of it."

The sun is a body of nearly nine hundred thousand miles in **diameter—**the surface of two billions two hundred and eighty-four millions of square miles, all aglow. If its substance be equally hot all through, it is a ball of 311,280,000,000,000,000 cubic miles of red-hotness!

GEO. G. CURTISS,

MANUFACTURER OF

"THE LITTLE HERO WASHER"

—AND—
"LITTLE HERO WRINGER."

No. 3 Aqueduct Street, Rochester, N. Y.

The women say that the Little Hero Washer is the greatest labor-saver of any thing that
ever entered the wash-room.

The Little Hero Wringer is self adjusting to the tub, self adjusting in the rolls, can wring
any thing from a pocket-handkerchief to a bed quilt, without changing the adjustment
and is supplied with the new patent indestructible rubber rolls warranted not to loosen from
the shaft.

WRINGERS REPAIRED WITH THE NEW STYLE ROLLS.

Agents wanted everywhere. Send for terms. Remember I am outside of all combina-
tions and can make prices to suit.

Dr. J C. DUTTON, Proprietor.

THE ELECTRO-THERMAL BATH.

The Russia and Turkish Baths

A series of these Baths will relieve if not cure nearly every form of disease. It cleans the body, purifies the blood, and equalizes the circulation, thus arousing dormant functions and restoring the highest measure of health possible to the individual.

TO THE LADIES.

For the complexion, no cosmetic ever compounded will compare with the Turkish Bath, the skin becomes fair and soft, moth patches disappear, and that sallow, sickly look of the skin, gives place to the ruddy glow of health. Ladies should take at least one a week, for health, luxury and cleanliness.

WE ALSO GIVE THE

SULPHUR VAPOR BATH,

And Medicated Baths of every description.

We refer by permission, to the following gentlemen, who have found the Baths highly beneficial and invigorating, and take pleasure in recommending them to the public

LAWTONS IMPROVED HARNESS.

OFFICE OF THE MASSACHUSETTS SOCIETY FOR THE PREVENTION OF CRUELTY TO ANIMALS.

46 WASHINGTON, ST., BOSTON, MASS., Sept. 15, 1873.

Gentlemen:—The Committee on Humane Inventions, at the New England Fair, have, under our offer of prizes, awarded you a gratuity of twenty-five dollars [\$25.00] for Lawton's Improved Harness, or Draught Attachment. Enclosed please find check for above amount.

GEORGE T. ANGEL, President,
Gov. WM. B. WASHBURN, Vice President,
Hon. H. L. PIERCE, M. C.
HENRY SALTONSTALL, Treasurer, and ninety-eight others.
P. S. We should be pleased to have your improvement in harness on exhibition at our office.

Yours truly,
FRANK B. FAY, Secretary.

Yours truly,
CHAS. A. CURRIER, Special Agent.

Twenty-five dollars was the highest award paid by the society.

This attachment does away with traces and breeching, and the above cut of the horse represents all the harness that is necessary. There is less than half the time spent in harnessing. As the horse is not encumbered with straps, he will travel easier. By observing the cut, you will see that this attachment has but few parts, which can be quickly attached and detached. It is cool, easy, and will not wear out in an ordinary lifetime. It is also self-adjusting, and the same collar will fit any horse, and allow him the greatest freedom of action. The metal parts are well polished and heavily plated, giving it a beautiful appearance.

Rights for sale, or Rights given in exchange for good land. Send for the price of your Town and County.

PRICES OF ATTACHMENT,

WITH BREAST STRAP, AND READY FOR USE, VIZ :

Gold Plated—\$50 | Nickel Silver Plated, will not tarnish. \$15

—••—

HERMANN N. PFAEFFLIN, Principal.

The principle on which this School is based requires a simultaneous study of the German and English languages. With this end in view, the Elementary **classes** in German and English will be combined, experience having proved that thus a knowledge of both languages **is** most easily **acquired**. To **facilitate** the admission of older pupils, there will be a Special German Course, in which the English pupils will receive instruction apart, at the same time sharing with the rest the English lessons, presided over by competent American teachers.

Having acquired a sufficient knowledge of German, these pupils will be incorporated **with** the German classes.

For younger pupils there is established a "Kindergarten" Course Children from four to seven are admitted.

Applications **will** be received at the School, Nos. 7 and 9 Mortimer Street.

Pupils, not living in the City, will be received as Boarders, on the most reasonable terms.

H. PFAEFFLIN, Principal.

THE SUNDAY MORNING

TIMES,

DANIELS & PHILLIPS,

Publishers.

Office, Over 16 West Main Street,

ROCHESTER, N. Y.

The Times has more readers than any other paper in Rochester.

“BECKENMEYER,” the humorous German dialect writer, JOHN H. YATES, the old man poet, are contributing to the TIMES.

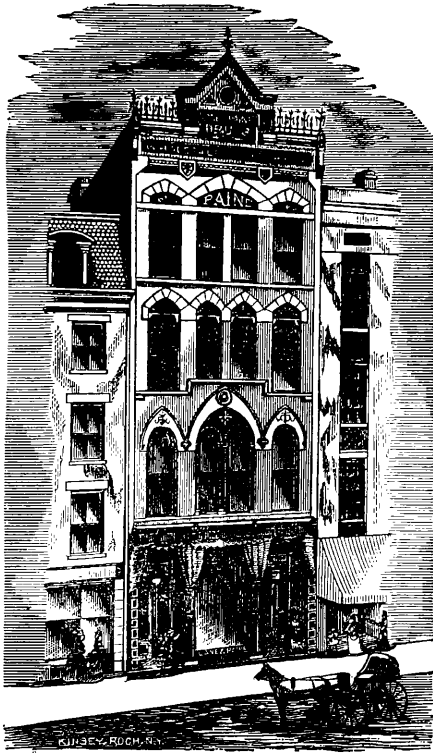

THE TIMES is published every Sunday morning and contains the news of the week, American Press Association dispatches up to three o'clock, Sunday morning, excerpts from New York, papers arriving Saturday night, and late locals.

A **wide-awake**, newsy Sunday morning paper is **read throughout** the day, while the dailies are, as a general thing, only glanced at for the telegraphic news and principal editorials!

Dr. O. CLARK SPRAGUE,

Physician for the Treatment and Cure of

Consumption, Catarrh, Asthma, Cancer,
Rheumatism, Paralysis, Female Com-
plaints, Liver and Kidney
Complaints,

and all acute and chronic diseases, invites all Invalids, given up by others
as past cure, to an examination of his mode of treatment.

We invite investigation, claim not to know everything, not to cure
everybody, but do claim to reason and common sense, and to cure seven
out of ten pronounced incurable. We particularly request those who have
tried this doctor and that scientific physician's boasted and advertised
medicines till wore out and discouraged to call upon us; it will cost you
nothing.

BROCKPORT.

BROCKPORT is an important railroad station on the Niagara Falls division of the N. Y. O. & H. R. R. R., 17 miles west of Rochester. It is a handsome village, and has recently evinced considerable manufacturing enterprise. Mowers and reapers, wagons and carriages, furniture, carved mouldings, sash, doors and blinds are the chief articles manufactured, and a large iron works employs a great many hands. There are two banks, two newspapers, several churches, hotels, a gaslight company, and the largest of the State Normal Schools in the village. Population, 4,300.

VILLAGE OFFICERS.

President—James Cotter, Jr.

Trustees—Angus G. Boyd, 2 years; Jacob A. Sleaster, 2 years; Thomas Berry, 1 year; Ezra N. Hill, 1 year.

Village Clerk—H. C. Hammond.

Jackson Club, Jr.

President—James P. Cornes.

Vice President—Wm. Welch.

Recording Secretary—John Shay.

Financial Secretary—Richard Shay.

Treasurer—John Crotty.

Warden—Daniel Alberts.

CHARLOTTE.

This village is annually growing in importance, both as a commercial port and a pleasant watering place. Its location at the mouth of the Genesee river, gives it great importance in the commerce of Lake Ontario, but in mercantile circles it is better known as the port of Rochester. All the large lake steamers call at this port, which is one of the finest harbors on the lake. Between Charlotte and Rochester several trains are run daily on the N. Y. C. R. R. The large blast furnace of the Rochester Iron Company, is the chief manufacturing establishment of the village.

LATTA HOUSE

GEO. C. & M. D. LATTA, Prop'rs,

CHARLOTTE, N. Y.

—•••—

This **house** has lately been improved and neatly furnished, and being centrally located, offers superior accommodations to all who are desirous of visiting one of the most beautiful summer resorts in this State.

The Latta House is a neat structure, erected on the most improved modern plan. The tables are supplied with all the delicacies of the season, and cannot be excelled outside of the large cities. The bar is stocked with choice **Wines**, Liquors, Ales and Cigars. The very best accommodation for all **our** patrons, at very moderate charges. Your patronage is solicited.

SPENCER HOUSE.

THOMAS VEAZIE, Prop. - Charlotte, Monroe Co. N.Y.

I **feel** confident in assuring its former patrons, as well as those whose health, business, or pleasure may call them to this vicinity, that no pains will be spared to **make** their visit an agreeable one. Everything about the Hotel will be conducted with a studious regard **for** the comfort of its guests. As there are many suits of rooms for families, and desirable single rooms for gentlemen, I have no fears of being able to furnish acceptable accommodations **for** all who may **favor** me with their patronage.

N. B.—All communications regarding the Hotel, its surroundings, &c., will be promptly answered.

I will guarantee all the Eggs to be fresh, carefully packed and shipped. Those favoring me with an order may rest assured they will be honorably dealt with.

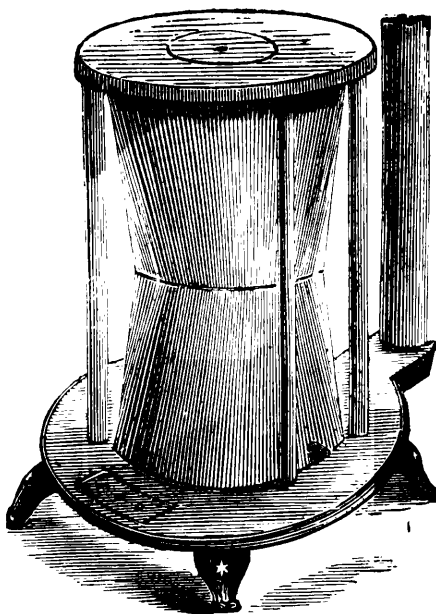

All orders must be accompanied with the money, or a Post Office Order for amount of Bill.

WM. B. GEDDES,

MANUFACTURER OF

COAL BURNER.

WOOD BURNER.

Flour and Fruit Barrels

AND DEALER IN

STAVES AND HOOPS.

A Good Supply Constantly on Hand.

Office and Yard, No. 56 Magne Street,

ROCHESTER, N. Y.

All Orders for the Patent Barrel Heater Promptly filled.

PRICE, \$30.00

Being located on the bank of the Canal, and convenient to the Rail Road, I am prepared to furnish Barrels and fill all orders on short notice to any point, either on the Canal or Rail Road.

HALF BARREL HEATERS.

I have a SMALL HEATER made on the same principle for heating Half Barrels, Butter Firkins, Kegs, etc., which I have just got up by request of parties using large Heaters—the small Heaters have been put into use and are giving perfect satisfaction. They can be used with either wood or coal.
